ASSIGNMENT – 2

Requirements Gathering - Conduct a 30-minute mock interview to gather requirements for a fictional app that helps organize community events. Summarize the requirements and how you would document and trace them in a one-page brief.

A Interview Overview :

A mock interview was conducted with a fictional client representing a local community center aiming to create an app for organizing events like workshops, festivals, and volunteer drives.

Functional Requirements:

- User registration and login system.
- Create, view, and manage events.
- RSVP and attendance tracking.
- Notifications / reminders for events.
- Admin dashboard for event approval and analytics.

Non-Functional Requirements:

- Mobile responsiveness
- Secure data handling
- Easy-to-use interface for all age groups.
- Scalable for multiple communities.

Stake holders:

- Community organizers
- Event attendees
- Admin Staff

Requirement Documentation:

- Tools : Google Docs for initial notes, Jira for tracking
- Formats : User stories, use-case diagrams, requirements traceability matrix (RTM)
- Example User Story:
As a user, I want to RSVP to events so I can receive reminders

Traceability Approach:

- Each requirement is given a unique ID
- Mapped to corresponding user stories, test cases, and design components.
- Maintained in a shared RTM spreadsheet updated throughout the SDLC.
